

Have you considered a career in the shipbuilding industry? We offer a vantage point with international development opportunities for expert positions in the maritime industry.

We are looking for a **Project Coordinator in Turku** for luxury cruise and passenger ship project tasks. The Project Coordinator works at the interface between NIT's design and production to ensure the success of projects.

The main tasks of the Project Coordinator:

- Contact person at the interface between HVAC planning and production and prefabricated part supplier
- Checking the design material, drawings and models
- Monitoring and coordination of construction and design changes between design and production and prefabricated part supplier.
- Ordering and coordination of pipe, duct and stair pre-fabrications in cooperation with the project team.
- Upkeeping of pre-fabrications lists
- Small design works
- Participates in project and design meetings, as well as design reviews.

The Project Coordinator reports progress on the project as agreed.

We expect suitable technical education and experience, good English and Finnish language skills, basic knowledge of MS Office software including Ms Project, Cadmatic, eBrowser and AutoCad - courage to use the software, initiative and confidentiality, and you to bring new perspectives to our comfortable and relaxed work community.

We are proud of these:

We are one of the most reliable partners in our industry.

We have a good team spirit, take good care of our staff and have a nice atmosphere in our work community. Our management is actively and interested in our daily work.

We offer you versatile work tasks and the opportunity to expand your skills according to your own development.
