

Are you looking for an opportunity to kick start your career in the marine industry? NIT Naval Interior Team is looking for a **Project Engineer** to join their team **in Rauma**. This is a unique opportunity to get on board with the marine industry and grow as a professional. NIT offers turnkey interior solutions on the construction of passenger ships, including interior installations, insulation, electrical installation, piping and HVAC.

As a **Project Engineer**, you will act as a right hand of the Project Manager. You will partner up with the Project Manager and support him in various tasks. You will be responsible for documentation, reporting and helping to update the schedule and budget. You will also be involved in procurement and planning support. This role is varied and involves administrative work and changing situations, so we hope you can keep your finger on the pulse.

The role offers you a great opportunity to develop as a professional and also develop the business. In this role, your attitude and willingness to learn is more important than your previous experience.

#### **You are offered**

- We offer you versatile work tasks and the opportunity to expand your skills according to your own development. Your next step could be for example Project Manager position.
- An exciting and immersive role in the shipbuilding industry, where you will gain a comprehensive insight into the shipbuilding industry
- A caring and people-oriented work community, where the company's values are reflected in the day-to-day activities
- Project-specific bonus, comprehensive occupational health care, sickness and accident insurance, sports and cultural allowances

#### **Work tasks**

- Supporting the Project Manager
- Documentation
- Reporting
- Assisting with procurement and design

#### **We are looking for**

- Language: English, Finnish is seen as an advantage
- Education: Bachelor/Masters of Engineering. For example Marine, Automation, Electrical or Civil Engineering
- Experience in marine industry and in project work is seen as an advantage
- Ability to read design drawings and knowledge of AutoCad
- Ability to work in fast paced changing environment
- Knowledge can be gained through education, experience or self-taught.

To succeed in the role, your **personal skills** are:

- Cooperative
- Structured
- Self-sufficient
- Self-developer

**Applications and further information:**

The recruitment process is handled by Academic Work.

Applications and inquiries via Academic Work ([link to the advert](#)).

The selection process is continuous and the advert may close before the recruitment process is completed if we have moved forward to the next phase. The process includes two tests: one personality test and one cognitive test. The tests are tools to find the right talent for the right position, to enable equality, diversity, and a fair process.

**NIT Naval Interior Team** has offices in Piikkiö, Turku, Eura and Rauma, as well as in Germany. Our main partners are shipyards and shipping companies. The company is responsible for the total deliveries of luxury cruise ships and passenger ships in different areas. Total deliveries include the entire project from planning to delivery as well as site aftercare. We currently employ about 100 people across NIT.
